10. Parkland Corp 5.75 9/16/2024	2.39%	0.01%	2.39%

**Top 10 by Active Weight** a measure of a security's contribution to the fund's active performance. A security's active weight is determined by calculating the difference between the security's % weighting in the fund as compared to security's % weighting in the benchmark, and, ranking the difference for all securities in the fund to generate the top 10 holdings.

Active weight differs from the fund's absolute % holding of the security and, as a result, a security that is a top 10 holding by portfolio weight may not necessarily be a top 10 holding by active weight.

This material is intended for use by Investment Advisors. There is no guarantee that a hedging strategy will be effective or achieve its intended effect. The use of derivatives or short selling carries several risks which may restrict a strategy in realizing its profits, limiting its losses, or, which cause a strategy to realize a loss. There may additional costs and expenses associated with the use of derivatives and short selling in a hedging strategy. Commissions, trailing commissions, management fees, performance fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Alternative funds can only be purchased through an IROC registered dealer and are available only in those jurisdictions where they may be lawfully offered for sale.
