PICTON MAHONEY FORTIFIED INCOME FUND

MANAGEMENT REPORT OF FUND PERFORMANCE (FOR THE PERIOD ENDED JUNE 30, 2019)

This semi-annual management report of fund performance contains financial highlights but does not contain the complete semi-annual financial statements for Picton Mahoney Fortified Income Fund (the "Fund"). If you have not received a copy of the semi-annual financial statements with the management report of fund performance, you may obtain a copy of the semi-annual financial statements, at no cost, by calling 416-955-4108 or toll-free at 1-866-369-4108, by writing to us at Picton Mahoney Asset Management, 33 Yonge Street, Suite 830, Toronto ON M5E 1G4, or by visiting our website at www.pictonmahoney.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the Fund's annual financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the Picton Mahoney Fortified Income Fund is to maximize total return to Unitholders through income and capital appreciation by investing primarily in global income securities while mitigating capital loss by engaging in hedging strategies for downside risk protection. Picton Mahoney Asset Management is the manager (the "Manager"), portfolio advisor (the "Portfolio Advisor") and the trustee (the "Trustee") of the Fund.

To achieve the investment objective, the Fund invests in an actively managed portfolio composed primarily of global corporate debt securities. The Fund may also invest in government bonds, loans, convertible bonds, preferred shares, and equities. The Fund will not be limited in the type of income securities in which it may invest. In selecting securities for the portfolio, the Portfolio Manager will focus on securities that it believes will maximize risk-adjusted returns.

The Fund may also choose to: i) invest a portion of the Fund's assets in exchange-traded funds to gain exposure to the securities described herein; ii) invest up to 100% of its portfolio in foreign securities; iii) engage in short selling in a manner which is consistent with the investment objectives of the Fund and as permitted by securities regulations; iv) engage in securities lending, repurchase and reverse repurchase transactions as permitted by securities regulations to seek to generate additional income; and v) use derivative instruments, such as options, futures, forward contracts and swaps, for both hedging and non-hedging strategies, in a manner which is consistent with the investment objectives of the Fund and as permitted by securities regulations, including to: 1) hedge against losses from changes in the prices of the Fund's investments and from exposure to foreign currencies; 2) implement option spreads by purchasing an option on a security and simultaneously selling an option on the same security with the same expiry date; and 3) gain exposure to individual securities and markets instead of buying the securities directly.

The Fund has also obtained exemptive relief from Canadian securities regulatory authorities to invest in ETFs listed on a Canadian or United States stock exchange that seek to replicate the daily performance of a widely-quoted market index (i) in an inverse multiple of 100%, or (ii) by a multiple of up to 200% or an inverse multiple of up to 200% (in either case, a "Permitted ETF"). In each case: (a) the investment would be made by the Fund in accordance with its investment objective; (b) the Fund would not short sell securities of any Permitted ETF; (c) the aggregate investment by the Fund in

Permitted ETFs would not exceed 10% of the Fund's net asset value, taken at market value at the time of purchase; and (d) the Fund would not purchase securities of a Permitted ETF that tracks the inverse of its underlying index (a "Bear ETF") or short sell securities of any issuer if, immediately after such purchase or short sale, more than 20% of the net asset value of the Fund, taken at market value at the time of the transaction, would consist of, in aggregate, securities of Bear ETFs and all securities sold short by the Fund.

RISK

There is no assurance that the Fund will be able to achieve its total return, capital preservation and distribution investment objectives. There is no assurance that the portfolio will earn any return and no assurances can be given as to the amount of distributions in future years and that the net asset value (the "NAV") of the Fund will appreciate or be preserved.

While risks are numerous, we believe the following are the most pertinent ones to be mindful of today:

- 1. Fixed Income Investment Risk** – Certain general investment risks can affect fixed income investments in a manner similar to equity investments. For example, specific developments relating to a company and general financial, political and economic (other than interest rate) conditions in the country in which the company operates. For government fixed income investments, general economic, financial and political conditions may affect the value of government securities. Since a Fund's unit price is based on the value of its investments, an overall decline in the value of its fixed income investments will reduce the value of the Fund and therefore, the value of your investment. However, your investment will be worth more if the value of the fixed income investments in the portfolio increases.
- 2. Credit Risk** – An issuer of a bond or other fixed income investment may not be able to pay interest or to repay the principal at maturity. The risk of this occurring is greater with some issuers than with others. For example, the risk of default is quite low for most government and high quality corporate securities. Where this risk is considered greater, the interest rate paid by the issuer is generally higher than for an issuer where this risk is considered to be lower. This risk could increase or decline during the term of the fixed income investment. Companies and governments that borrow money, as well as their debt securities, may be rated by specialized rating agencies. A downgrade in an issuer's credit rating or other adverse news regarding an issuer can reduce a security's market value. Lower rated debt instruments generally offer a better yield than higher-grade debt instruments, but have the potential for substantial loss.
- 3. Interest Rate Risk** – Mutual funds that invest in fixed income securities, such as bonds, and money market instruments, are sensitive to changes in interest rates. In general, when interest rates are rising, the value of these investments tends to fall. When rates are falling, fixed income securities tend to increase in value. Fixed income securities with longer terms to maturity are generally more sensitive to changes in interest rates. Certain types of fixed income securities permit issuers to repay principal before the security's maturity date. There is a risk that an issuer will exercise this prepayment right after interest rates have fallen and the funds that hold these fixed income securities will receive payments of principal before the expected maturity date of the security and may need to reinvest these proceeds in securities that have lower interest rates.

PICTON MAHONEY FORTIFIED INCOME FUND

MANAGEMENT REPORT OF FUND PERFORMANCE (FOR THE PERIOD ENDED JUNE 30, 2019)

For further details relating to risks of investing in the Fund, please refer to the *Specific Investment Risks*, *Investment Risk Classification Methodology*, and *Who Should Invest in the Funds* sections of the Simplified Prospectus.

RESULTS OF OPERATIONS

For the period January 1, 2019 to June 30, 2019, the net asset value of the Fund increased by approximately \$33.7 million from \$354.8 million to \$388.5 million. During the same period, performance on the Fund's portfolio increased its assets by \$13.3 million. The Fund also received \$84.6 million in proceeds, had reinvestment of distributions of \$3.8 million, net redemptions of \$60.2 million, and paid distributions totaling \$7.8 million. For the period January 1, 2019 to June 30, 2019, the Fund Class A units returned 3.06%, the Fund Class F units returned 3.62%, the Fund Class FT units returned 3.61%, the Fund Class T units returned 3.05%, and the Fund Class I units returned 4.18%. Class A, F, FT, T, and I units underperformed the reference index (the "Performance Fee Index"). The Performance Fee Index is comprised of 75% BofA Merrill Lynch Global High Yield Index and 25% BofA Merrill Lynch Global Corporate Index reported in Canadian dollars. The Performance Fee Index returned 8.88% over the same period.

There have been no changes made to the broader Picton Mahoney Fortified Income Fund during the reporting period. The Fund has been invested in a diversified basket of global corporate bonds in a bottom-up approach diversified by sectors. These investments are primarily in medium-grade fixed income securities (rated B-BBB) issued in developed markets. Short positions have been diversified globally, with a concentration on event-driven special situations. The options hedging overlay was invested primarily in puts against credit and equity indices as well as government bond futures. The Fund was 100% currency-hedged during the period.

Over this timeframe, we remained focused on providing sustainable income, growth and downside protection. Based on market conditions, our target net position was 70% to 80% invested in securities, leaving 20% to 30% in capital to take advantage of opportunities as they arose and to facilitate shorting. Geographically, investments have been concentrated in the U.S. and Europe, with participation in core Canadian names. From a sector exposure perspective, the Fund has been well diversified with an overweight in the Financials sector.

The Fund underperformed its benchmark (75% ICE BofA Merrill Lynch Global High Yield Index / 25% ICE BofA Merrill Lynch Global Corporate Index (TR) (Hedged to CAD)) over the six-month period. A relatively defensive posture in the credit portfolio including a shorter portfolio duration drove the relative underperformance.

We continued to employ the rules-based options overlay in the Fund, allocating the option budget over rate, credit and cross-asset indices, depending on the exposure of the portfolio and the relative attractiveness of the cost to hedge.

RECENT DEVELOPMENTS

Credit markets experienced a very strong first half in 2019 as global central banks pivoted aggressively and signaled that accommodative monetary policy would be used to combat persistently low inflation and decelerating global growth. As the U.S.-China trade war continues to drive global economic uncertainty, markets are expecting several interest rate cuts from the Fed as well as a new round of easing from the ECB.

A major tailwind for credit markets year to date has been lower risk-free interest rates with the yield on the U.S. 10-year Treasury Note falling from 2.68% to 2.01% during the six-month period.

As we enter the second half of 2019 we are maintaining a defensive portfolio positioning comprised primarily of short duration, high quality credit. Thankfully, dispersion has been increasing within the credit market, providing long and short opportunities. The team remains focused on being entrepreneurial and creative to seek out attractive potential return opportunities.

Recognizing the need to be patient and defensive while also taking advantage of dispersion (both long and short), we have positioned the Fund as follows:

- **Patient capital:** The majority of assets are invested in coupon-clipping, low-volatility, defensive credit.
- **Yield with upside:** We combine that patient capital with bonds that also provide income but—more importantly—have some kind of catalyst for upside. Currently, we believe the best source of upside comes from defensive capital structures with restrictive covenants with an early takeout thesis.
- **Overlay hedges:** We take that long portfolio (patient capital and yield with upside buckets) and allocate a budget for hedges. With current levels of volatility, it is not expensive to protect investments. Also, with dispersion increasing, we are seeing more short-side opportunities.
- **Dry powder:** At the same time, we remain defensively positioned with our net credit positions at the low end, giving us dry powder to buy on a pullback. Our analysts have a watchlist of credits to buy should relative value or market levels present an attractive buying opportunity.

RELATED PARTY TRANSACTIONS

Picton Mahoney Asset Management is the manager (the "Manager"), portfolio advisor (the "Portfolio Advisor"), and trustee ("the Trustee") of the Fund. The Manager is an investment manager focused on equity and fixed income securities investments with approximately \$7.3 billion of assets under management as of June 30, 2019.

Management Fees

As a result of providing investment and management services, the Manager receives a management fee calculated and accrued daily based on the NAV of the class of units of the Fund, plus applicable taxes, payable on the last day of each calendar quarter. For the period January 1, 2019 to June 30, 2019, the Fund incurred management fees of \$2,003,155 plus applicable taxes. Management fees in respect of Class I units are direct fees negotiated with the investor, paid directly by the investor, and would not exceed the management fee payable on Class A units of the Fund. The Manager uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as general administrative expenses relating to Picton Mahoney's role as Manager. The following is a breakdown:

PICTON MAHONEY FORTIFIED INCOME FUND

MANAGEMENT REPORT OF FUND PERFORMANCE (FOR THE PERIOD ENDED JUNE 30, 2019)

As a Percentage of Management Fees			
	Annual Rates	Dealer Compensation	General Administration and Investment Advice
Class A units	2.00%	50.58%	49.42%
Class F units	1.00%	-	100.00%
Class FT units	1.00%	-	100.00%
Class T units	2.00%	50.50%	49.50%

Out of the management fees that the Manager received from the Fund, the Manager paid trailer commissions of \$281,926 for the period January 1, 2019 to June 30, 2019.

Performance Fees

The Manager receives a performance fee in respect of each class of units of the Fund. The performance fee is equal to the daily NAV of the class of units of a Fund during the calendar quarter multiplied by 20% of the amount by which the total return of the class of units exceeds the total percentage increase or decrease in a reference index (the "Performance Fee Index") since the end of the period for which the last performance fee was paid, plus applicable taxes. If at any time the total return of the class of units of a Fund is less than its Performance Fee Index, then no performance fee will be payable until the total return of the class of units of such Fund relative to its Performance Fee Index exceeds the amount of the deficiency calculated on a percentage basis. For the period January 1, 2019 to June 30, 2019, the Fund incurred no performance fees.

Independent Review Committee

The Fund receives standing instructions (the "SI") from the independent review committee (the "IRC"). The SI constitutes a written approval or recommendation from the IRC that permits the Manager to proceed with specific action(s) set out in the SI on an ongoing basis. The SI is designed to ensure that the Manager's actions are carried out in accordance with the law, the instrument and the Manager's policies and procedures in order to achieve a fair and reasonable result for the Fund. The SI outlines actions related to i) Fees and Expenses; ii) Trade Allocations; iii) Broker Selections; iv) Code of Ethics and Conduct; v) Portfolio Pricing Issues, amongst other things. The Manager must provide the IRC with a written report summarizing each instance where the Manager has relied on the SI. For the period January 1, 2019 to June 30, 2019, the IRC did not provide any recommendations to the Manager.

Net Asset Value per unit	11.68	11.41	11.82	11.07	9.98

EXPLANATORY NOTES

- (1) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.
- (2) Distributions were paid in cash, reinvested in additional units of the Fund, or both.
- (3) This information is provided as at the periods shown.
- (4) The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. In the period the shares are established, the MER is annualized. Effective August 20, 2019, the management fee was changed in respect of certain classes of the Fund. If the change to the management fee would have been in effect throughout 2019, the adjusted MER for each class of the Fund would be: Class A - 2.32%, Class F - 1.21%, Class FT - 1.23%, Class T - 2.31%. If the change to the management fee would have been in effect throughout 2018, the adjusted MER for each class of the Fund would be: Class A - 2.40%, Class F - 1.51%, Class FT - 1.52%, Class T - 2.44%.
- (5) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (6) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. Portfolio turnover rate is calculated based on the lesser of the cost of purchases or proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.
- (7) For the period October 29, 2015 (commencement of operations) to December 31, 2015.

PICTON MAHONEY FORTIFIED INCOME FUND

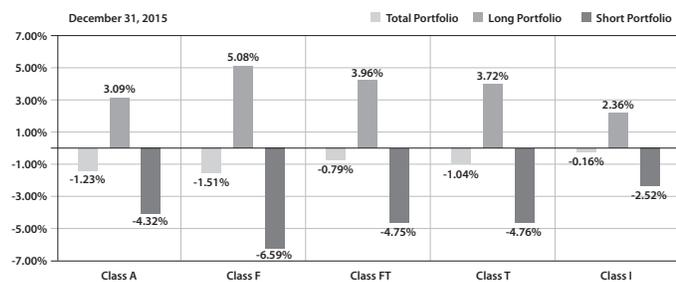

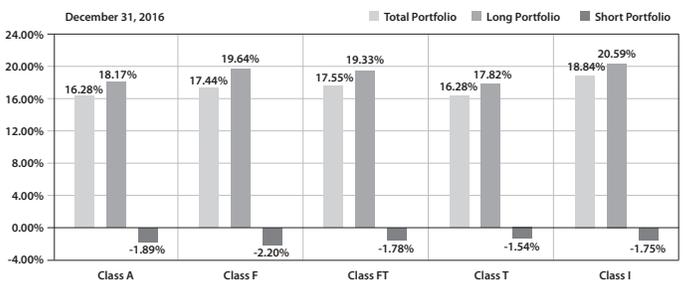

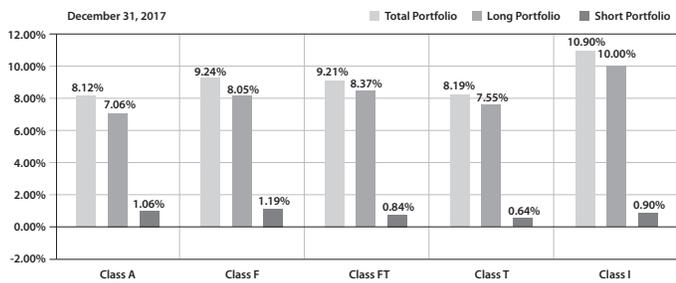

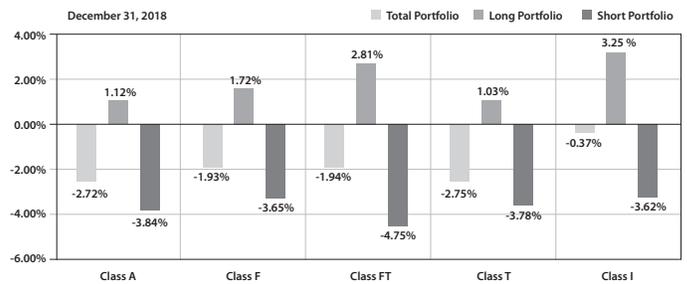

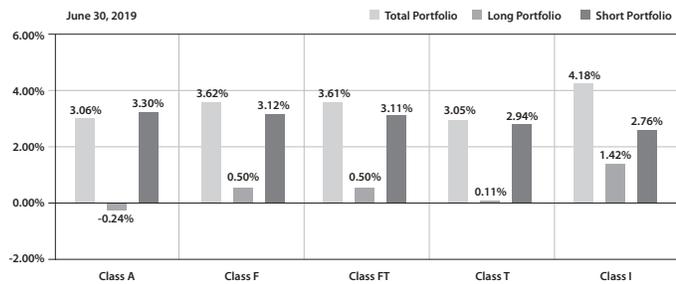

MANAGEMENT REPORT OF FUND PERFORMANCE (FOR THE PERIOD ENDED JUNE 30, 2019)

PAST PERFORMANCE

This section describes the Fund's performance over the past period since inception. The information shown assumes that any distributions made by the Fund were reinvested in additional units of the Fund. All rates of returns are calculated based on the NAV of the particular series of the Fund. Past returns of the Fund do not necessarily indicate how it will perform in the future.

Year-by-Year>Returns

The following chart indicates the performance of each series of the Fund each year from inception on October 29, 2015 to June 30, 2019. The chart shows, in percentage terms, how much an investment made on the first day of the period would have grown or decreased by the last day of the period.

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Fund, its future performance, strategies and events. Forward-looking statements include words such as "anticipates," "believe," "could," "expect," "estimate," "may" or negative versions thereof and similar expressions. By their nature, forward-looking statements make assumptions on future events that are subject to inherent risks and uncertainties. There is significant risk that predictions on the Fund, future events and economic conditions will not prove to be accurate. Forward-looking statements are not guarantees of future performance and actual results may differ materially from management projected expectations due to factors such as general market and economic conditions, interest rates and foreign currency fluctuations, changes to regulatory requirements and guidelines, changes in technology, effects of competition in the various business areas and unforeseen natural disasters and catastrophes. As a result of these factors, readers of this document are cautioned not to place undue reliance on these statements and before making any investment decisions should clearly consider these factors, among other factors. All opinions contained in the forward-looking statements are subject to change without notice and are provided in good faith, unless required by applicable law.

**THINK AHEAD.
STAY AHEAD.**
