PICTON MAHONEY FORTIFIED MULTI-ASSET FUND

MANAGEMENT REPORT OF FUND PERFORMANCE (FOR THE PERIOD ENDED JUNE 30, 2022)

This semi-annual management report of fund performance contains financial highlights but does not contain the complete semi-annual financial statements for Picton Mahoney Fortified Multi-Asset Fund (the "Fund"). If you have not received a copy of the semi-annual financial statements with the management report of fund performance, you may obtain a copy of the semi-annual financial statements, at no cost, by calling 416-955-4108 or toll-free at 1-866-369-4108, by writing to us at Picton Mahoney Asset Management, 33 Yonge Street, Suite 830, Toronto, Ontario, M5E 1G4, or by visiting our website at www.pictonmahoney.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the Fund's annual financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the Picton Mahoney Fortified Multi-Asset Fund is to achieve long-term capital appreciation by investing primarily in global equity securities and global income securities while mitigating capital loss by engaging in hedging strategies for downside risk protection. Picton Mahoney Asset Management is the manager (the "Manager"), portfolio advisor (the "Portfolio Advisor") and the trustee (the "Trustee") of the Fund.

To achieve its investment objective, the Fund's portfolio will include a tactical blend of global equities, global fixed income securities, derivatives of the securities in these asset classes and cash. The Fund's tactical allocation to these asset classes is based on the Portfolio Advisor's general market outlook, which is derived from the Portfolio Advisor's proprietary fundamental and quantitative research and analysis.

The Fund will typically have exposure of 25% to 75% of its portfolio to global listed equity securities and 25% to 75% to global fixed income securities of public or private companies. However, based on the prevailing market conditions, the Portfolio Advisor may allocate up to 100% of its portfolio in any one asset class.

The global equity component will invest primarily in equities of issuers of varying sizes of market capitalization. The global fixed income component of the Fund's portfolio will be invested primarily in global high yield debt securities, and may also be invested in global investment grade debt securities, government bonds, loans, convertible bonds, preferred shares, and dividend-paying equity securities. The global equity and global fixed income components of the Fund's portfolio may be invested in equity and fixed income mutual funds managed by the Manager in order to obtain exposure to these securities.

The Fund may also choose to: i) invest up to 100% of its portfolio in foreign securities; ii) invest a portion of the Fund's assets in exchange-traded funds to gain exposure to the securities described herein; iii) engage in short selling in a manner which is consistent with the investment objectives of the Fund and as permitted by securities regulations; iv) engage in securities lending, repurchase and reverse repurchase transactions as permitted by securities regulations to seek to generate additional income; and v) use derivative instruments, such as options, futures, forward contracts and swaps, for both hedging and non-hedging strategies, in a manner which is consistent with the investment objectives of the Fund and as permitted by securities regulations, including to: 1) hedge against losses from changes in the prices of the Fund's investments and from exposure to foreign currencies; 2) implement option spreads by purchasing an option on a security and simultaneously selling an option on

the same security with the same expiry date; 3) write covered call options on the securities that the Fund owns in order to seek to generate income from option premium; and 4) gain exposure to individual securities and markets instead of buying the securities directly.

The Fund has also obtained exemptive relief from Canadian securities regulatory authorities to invest in ETFs listed on a Canadian or United States stock exchange that seek to replicate the daily performance of a widely-quoted market index (i) in an inverse multiple of 100%, or (ii) by a multiple of up to 200% or an inverse multiple of up to 200% (in either case, a "Permitted ETF"). In each case: (a) the investment would be made by the Fund in accordance with its investment objective; (b) the Fund would not short sell securities of any Permitted ETF; (c) the aggregate investment by the Fund in Permitted ETFs would not exceed 10% of the Fund's net asset value, taken at market value at the time of purchase; and (d) the Fund would not purchase securities of a Permitted ETF that tracks the inverse of its underlying index (a "Bear ETF") or short sell securities of any issuer if, immediately after such purchase or short sale, more than 20% of the net asset value of the Fund, taken at market value at the time of the transaction, would consist of, in aggregate, securities of Bear ETFs and all securities sold short by the Fund.

RISK

There is no assurance that the Fund will be able to achieve its total return, capital preservation and distribution investment objectives. There is no assurance that the portfolio will earn any return and no assurances can be given as to the amount of distributions in future years and that the net asset value (the "NAV") of the Fund will appreciate or be preserved.

While risks are numerous, we believe the following are the most pertinent ones to be mindful of today:

1. **Equity Investment Risk** – Equity investments, such as stocks, carry several risks. A number of factors may cause the price of a stock to fall. These include specific developments relating to the company, stock market conditions where the company's securities trade and general economic, financial and political conditions in the countries where the company operates. Since a Fund's unit price is based on the value of its investments, an overall decline in the value of the stocks it holds will reduce the value of the Fund and, therefore, the value of your investment. However if the price of the stocks in the portfolio increases, your investment will be worth more. Equity funds generally tend to be more volatile than fixed income funds, and the value of their units can vary widely.
2. **Fixed Income Investment Risk** – Certain general investment risks can affect fixed income investments in a manner similar to equity investments. For example, specific developments relating to a company and general financial, political and economic (other than interest rate) conditions in the country in which the company operates. For government fixed income investments, general economic, financial and political conditions may affect the value of government securities. Since a Fund's unit price is based on the value of its investments, an overall decline in the value of its fixed income investments will reduce the value of the Fund and therefore, the value of your investment. However, your investment will be worth more if the value of the fixed income investments in the portfolio increases.
3. **Credit Risk** – An issuer of a bond or other fixed income investment may not be able to pay interest or to repay the principal at maturity. The risk of this occurring is greater with some issuers than with others. For example,

PICTON MAHONEY FORTIFIED MULTI-ASSET FUND

MANAGEMENT REPORT OF FUND PERFORMANCE (FOR THE PERIOD ENDED JUNE 30, 2022)

the risk of default is quite low for most government and high quality corporate securities. Where this risk is considered greater, the interest rate paid by the issuer is generally higher than for an issuer where this risk is considered to be lower. This risk could increase or decline during the term of the fixed income investment. Companies and governments that borrow money, as well as their debt securities, may be rated by specialized rating agencies. A downgrade in an issuer's credit rating or other adverse news regarding an issuer can reduce a security's market value. Lower rated debt instruments generally offer a better yield than higher-grade debt instruments, but have the potential for substantial loss.

For further details relating to risks of investing in the Fund, please refer to the *Specific Investment Risks*, *Investment Risk Classification Methodology*, and *Who Should Invest in the Funds* sections of the Simplified Prospectus.

RESULTS OF OPERATIONS

For the period January 1, 2022 to June 30, 2022, the net asset value of the Fund decreased by approximately \$37.7 million from \$203.6 million to \$165.9 million. During the same period, performance on the Fund's portfolio decreased its assets by \$21.3 million. The Fund also received \$27.7 million in proceeds, had reinvestment of distributions of \$0.2 million, had net redemptions of \$43.7 million and paid distributions totaling \$0.6 million. For the period January 1, 2022 to June 30, 2022, the Fund Class A units returned -11.24%, the Fund Class F units returned -11.02%, the Fund Class FT units returned -11.01%, the Fund Class T units returned -11.22%, and the Fund Class I units returned -10.30%. Class A, F, FT, T and I units all outperformed the reference index (the "Performance Fee Index"). The Performance Fee Index is comprised of 15% S&P/TSX Composite Total Return Index, 30% MSCI World Index, 10% FTSE TMX Canada 30 Day T-Bill Index, 25% BofA Merrill Lynch Global High Yield Index, 5% BofA Merrill Lynch Global Corporate Index, and 15% BofA Merrill Lynch G7 Global Government Index reported in Canadian dollars. The Performance Fee Index returned -12.83% over the same period.

The six-month period ended June 30, 2022 saw a significant increase in risk across global capital markets with notable themes around ongoing inflation, war and the potential of a recession.

Increased hawkishness among global central bankers caused weakness in both government bonds and equity markets, with the most notable declines in long duration, speculative corners of equity markets. The invasion of Ukraine ushered a new dynamic of volatility later in the first quarter, as inflation dynamics around the energy, metals and grains markets highlighted the fragility of global supply chains in the wake of sanctions on Russia and inability for key commodities to reach and exit key ports in the region.

As we moved into the second quarter, the war in Ukraine occupied fewer headlines in the financial press, replaced by growing fears of recession, as aggressive rate hikes to combat inflation threatened to stymie global economic growth. Most asset classes moved lower through Q2 and higher government bond yields continued to impact equity valuations and credit spreads, while growth-sensitive commodities became subject to more aggressive profit-taking on recession fears. Most asset classes ended the period with negative year-to-date returns, indicating few places to hide for asset allocation strategies.

As an asset class, Developed Equities, via the Fund's core equity component (Picton Mahoney Fortified Equity Fund), was the primary detractor to

performance. While the net (long minus short) allocation to equities was held below the typical 60% "balanced" allocation, equity style bore some of the brunt of the dynamics addressed above.

The second largest holding, the Picton Mahoney Fortified Income Fund, represents our preferred allocation in fixed income, as it aims to hedge interest rate, credit and liquidity risks. The interest rate hedging was beneficial to performance as rates moved aggressively toward a peak mid-June, but given the somewhat ruthless dynamics in asset markets at large, any long exposure to credit would have translated to negative performance. That said, we are pleased with the relative performance of our fixed income approach versus traditional benchmarks and broad credit strategies in the marketplace.

Relative to its own history, the fund performed more in line with traditional balanced allocations, yet we can point to numerous aspects of attribution that speak to a more diversified return stream. It was a frustrating period, as mentioned above, given there were few places for even diversified investors to hide.

RECENT DEVELOPMENTS

Our proprietary economic cycle model holds its highest odds for a pending recession, which is a deterioration from the last report. We remain keyed in on the dynamics of inflation, monetary policy and potential recession risk. Leading indicators for inflation and inflation expectations in rates markets have eased substantially, but until actual data confirms that inflation is closer to target, central banks may get this evidence "too late" to stave off a more meaningful growth slowdown.

As such, we are maintaining an asset allocation which, on a net basis, remains below the typical 60% allocated to equities in a diversified portfolio. Commodity exposure, while modest, is part of the strategic asset allocation and as such, opportunities to hedge risks to economically-sensitive commodities are being sought. Again, within the fixed income sleeve, we believe the approach offered by the Picton Mahoney Fortified Income Fund is prudent within an asset class that is proving more volatile than investors have come to understand in the past few decades of being invested.

From a macro perspective, our house view is that the U.S. Federal Reserve (and other central banks in the developed economies) may be forced to "pause" in their hiking cycle, lest the rapidly tightening monetary conditions force a recession. As noted above, reported inflation data will have to meaningfully move toward central banks' targets in order to justify this "pause" in the inflation fight. Our primary concern is that in the months ahead, the pause may prove too little, too late. To some extent, market participants are "front-running" this pause, as rates markets have given back a significant part of the move to the highs in rates made in June and equity markets seem poised to rally from oversold conditions. From our perspective, we do not seek to anticipate such moves, but rather objectively respond to the evidence as it unfolds. We remain relatively conservatively positioned for now, but look out toward year-end for a potential shift to a risk-on stance should the risk/return setup warrant it.

RELATED PARTY TRANSACTIONS

Picton Mahoney Asset Management is the manager (the "Manager"), portfolio advisor (the "Portfolio Advisor"), and trustee ("the Trustee") of the Fund. The Manager is an investment manager focused on equity and fixed income securities investments with approximately \$8.6 billion of assets under

PICTON MAHONEY FORTIFIED MULTI-ASSET FUND

MANAGEMENT REPORT OF FUND PERFORMANCE (FOR THE PERIOD ENDED JUNE 30, 2022)

management as of June 30, 2022. The Fund holds: i) 4,209,939 units (market value of \$63,879,927) totaling 72.8% of the net assets of Picton Mahoney Fortified Equity Fund; ii) 4,443,951 units (market value of \$52,795,472) totaling 8.0% of the net assets of Picton Mahoney Fortified Income Fund; iii) 61,041 units (market value of \$954,167) totaling 1.8% of the net assets of Picton Mahoney Fortified Active Extension Alternative Fund; iv) 574,806 units (market value of \$8,075,214) totaling 3.2% of the net assets of Picton Mahoney Fortified Long Short Alternative Fund; and v) 503,239 units (market value of \$7,162,556) totaling 0.9% of the net assets of Picton Mahoney Fortified Market Neutral Alternative Fund. For the period January 1, 2022 to June 30, 2022, the Manager has absorbed \$23,530 of expenses.

Management Fees

As a result of providing investment and management services, the Manager receives a management fee calculated and accrued daily based on the NAV of the class of units of the Fund, plus applicable taxes, payable on the last day of each calendar quarter. For the period January 1, 2022 to June 30, 2022, the Fund incurred management fees of \$1,098,773 plus applicable taxes. Management fees in respect of Class I units are direct fees negotiated with the investor, paid directly by the investor, and would not exceed the management fee payable on Class A units of the Fund. The Manager uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as general administrative expenses relating to Picton Mahoney's role as Manager. The following is a breakdown:

As a Percentage of Management Fees			
	Annual Rates	Dealer Compensation	General Administration and Investment Advice
Class A units	1.90%	52.57%	47.40%
Class F units	0.90%	-	100.00%
Class FT units	0.90%	-	100.00%
Class T units	1.90%	52.59%	47.41%

Out of the management fees that the Manager received from the Fund, the Manager paid trailer commissions of \$259,148 for the period January 1, 2022 to June 30, 2022.

Performance Fees

The Manager receives a performance fee in respect of each class of units of the Fund. The performance fee is equal to the daily NAV of the class of units of a Fund during the calendar quarter multiplied by 20% of the amount by which the total return of the class of units exceeds the total percentage increase or decrease in a reference index (the "Performance Fee Index") since the end of the period for which the last performance fee was paid, plus applicable taxes. If at any time the total return of the class of units of a Fund is less than its Performance Fee Index, then no performance fee will be payable until the total return of the class of units of such Fund relative to its Performance Fee Index exceeds the amount of the deficiency calculated on a percentage basis. Investors in Class I units may negotiate a different performance fee than the one described herein or no performance fee at all. Any performance fee for Class I units will be paid directly to the Manager. For the period January 1, 2022 to June 30, 2022, the Fund incurred performance fees of \$356,221 plus applicable taxes.

Independent Review Committee

The Fund receives standing instructions (the "SI") from the independent review committee (the "IRC"). The SI constitutes a written approval or recommendation from the IRC that permits the Manager to proceed with specific action(s) set out in the SI on an ongoing basis. The SI is designed to ensure that the Manager's actions are carried out in accordance with the law, the instrument and the Manager's policies and procedures in order to achieve a fair and reasonable result for the Fund. The SI outlines actions related to i) Fees and Expenses; ii) Trade Allocations; iii) Broker Selections; iv) Code of Ethics and Conduct; v) Portfolio Pricing Issues, amongst other things. The Manager must provide the IRC with a written report summarizing each instance where the Manager has relied on the SI. For the period January 1, 2022 to June 30, 2022, the IRC did not provide any recommendations to the Manager.

EXPLANATORY NOTES

(1) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(2) Distributions were paid in cash, reinvested in additional units of the Fund, or both.

(3) This information is provided as at the periods shown.

(4) The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. In the period the shares are established, the MER is annualized. Effective August 20, 2019, the management fee was changed in respect of certain classes of the Fund. If the change to the management fee would have been in effect throughout 2019, the adjusted MER for each class of the Fund would be: Class A - 2.40%, Class F - 1.29%, Class FT - 1.29%, Class T - 2.40%.

(5) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. This figure includes an adjustment for the Fund's portion of the trading expenses for the underlying funds held.

(6) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. Portfolio turnover rate is calculated based on the lesser of the cost of purchases or proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

PICTON MAHONEY FORTIFIED MULTI-ASSET FUND

MANAGEMENT REPORT OF FUND PERFORMANCE (FOR THE PERIOD ENDED JUNE 30, 2022)

PAST PERFORMANCE

This section describes the Fund's performance over the past period since inception. The information shown assumes that any distributions made by the Fund were reinvested in additional units of the Fund. All rates of returns are calculated based on the NAV of the particular series of the Fund. Past returns of the Fund do not necessarily indicate how it will perform in the future.

Year-by-Year>Returns

The following chart indicates the annual performance of each series of the Fund each year from inception on October 29, 2015 to June 30, 2022. The chart shows, in percentage terms, how much an investment made on the first day of the period would have grown or decreased by the last day of the period.

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Fund, its future performance, strategies and events. Forward-looking statements include words such as "anticipates", "believe", "could", "expect", "estimate", "may" or negative versions thereof and similar expressions. By their nature, forward-looking statements make assumptions on future events that are subject to inherent risks and uncertainties. There is significant risk that predictions on the Fund, future events and economic conditions will not prove to be accurate. Forward-looking statements are not guarantees of future performance and actual results may differ materially from management projected expectations due to factors such as general market and economic conditions, interest rates and foreign currency fluctuations, changes to regulatory requirements and guidelines, changes in technology, effects of competition in the various business areas and unforeseen natural disasters and catastrophes. As a result of these factors, readers of this document are cautioned not to place undue reliance on these statements and before making any investment decisions should clearly consider these factors, among other factors. All opinions contained in the forward-looking statements are subject to change without notice and are provided in good faith, unless required by applicable law.

**THINK AHEAD.
