

**OUTLOOK & REVIEW**

- > In December, our Fund returned -1.04% (Class A) and -0.95% (Class F) which slightly underperformed the blended benchmark composed of 75% ICE BofAML Global High Yield Index / 25% ICE BofAML Global Corporate Index (TR) (Hedged to CAD) on the month while outperforming the benchmark for the quarter and the year.
- > Credit volatility accelerated in December with risk-off across all markets, compounded by capitulation out of asset managers in an effort to raise cash going into year end. We took advantage of the sell-off, purchasing over 10% of the portfolio at discounted prices. The purchases included Patient Capital watch-list names, covering short positions, and adding to one of our higher conviction Yield-With-Upside investments.
- > Stepping back from short term performance, on the year we navigated corporate bond yields increasing 2.3% (from 5.8% to 8.1%), put capital to work thereby increasing our portfolio yield from 4.2% to 7.4% while protecting the downside.
- > For our current views please join the Bond team for our upcoming Income Insights call on January 23rd at 11am for a deep discussion on our positioning and 2019 outlook.
