

OUTLOOK & REVIEW

- > In December, our Fund returned -0.65% (Class A) and -0.56% (Class F) which slightly underperformed the HFRX Fixed Income-Credit Index benchmark.
- > Credit volatility accelerated in December with risk-off across all markets, compounded by capitulation out of asset managers in an effort to raise cash going into year end. We took advantage of the sell-off, purchasing over 10% of the portfolio at discounted prices. The purchases included Patient Capital watch-list names, covering short positions, and adding to one of our higher conviction Yield-With-Upside investments.
- > Stepping back from short term performance, on the year we navigated corporate bond yields increasing 2.3% (from 5.8% to 8.1%), put capital to work thereby increasing our portfolio yield from 4.2% to 7.4% while protecting the downside.
- > For our current views please join the Bond team for our upcoming Income Insights call on January 23rd at 11am for a deep discussion on our positioning and 2019 outlook from a portfolio and market perspective.

Note: (*) refers to average annualized performance.

Highlight

The Fund's objective is to provide consistent long-term capital appreciation with an attractive risk-adjusted rate of return.

Strategy

The Fund will take concentrated positions in event driven situations by investing, long or short, in securities that are impacted by some form of catalyst such as a corporate event, capital structure re-organization or other opportunistic situations. The Fund seeks gains through income and movements in security prices that can occur over a short to long-term time horizon providing an attractive risk-adjusted return with less volatility to the traditional equity market.

Disclaimer

The inception date of the Class F Units of the fund is July 2, 2015. Performance and Performance Analysis data is presented since inception for Class F Units of the Fund. Net Assets are reported for Class A, F and I combined. Maximum Drawdown, Period of Drawdown and Time Under Water are calculated using monthly data. Beta, standard deviation and Sharpe Ratio are calculated using data from each weekly valuation date. Option positions against credit indices are included in the credit component of the security type allocation. Top 5 holdings are reported in alphabetical order. Weighted Average Credit Rating is calculated using a composite of the S&P, Moody's, DBRS and Fitch credit ratings. The Fund's performance data is compared to the HFrx Fixed Income-Credit Index (in CAD \$), a non-investable index designed to provide a broad measure of the performance of hedge funds that invests across a broad continuum of credit sub-strategies, including corporate, sovereign, distressed, convertible, asset backed, capital structure arbitrage, multi-strategy and other relative value and event driven sub-strategies. The composition of the Fund's portfolio will significantly differ from the Index due to the Fund's investment strategy. Please see the Fund's Confidential Offering Memorandum for more information, including investment strategies, risk factors and investor eligibility. This material is for informational purposes only, is subject to change and is not an offer or solicitation to sell units of the Fund. Commissions, trailing commissions, management fees and expenses all may be associated with fund investments. The Fund is not guaranteed, its value changes frequently and past performance may not be repeated.
